

CGH5090 Cornerguards

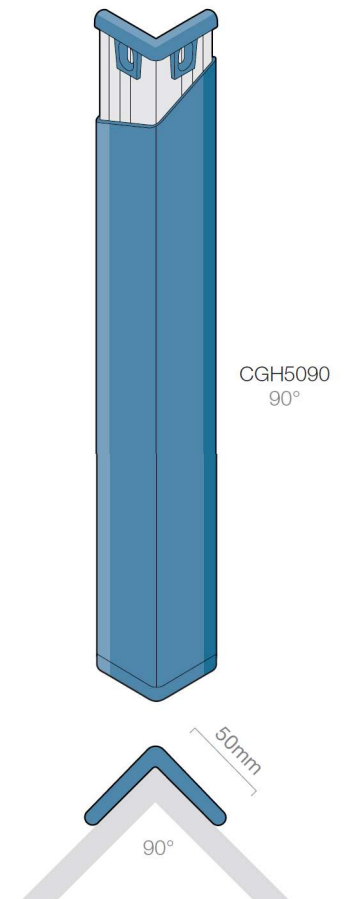

Corners are one of the most vulnerable parts of a building and when left exposed are often damaged from everyday wheeled and pedestrian traffic. Corner guards are ideal for reducing maintenance costs and maintaining interior appearances and can be combined with other Gradus protection products to provide a complete solution.

Gradus CGH5090 corner guards are available in a variety of colours and heights to suit all building requirements.

CGH5090 is a surface mounted corner guard comprising aluminium retainer, PVC-u cover and PVC-u top/bottom caps. The aluminium retainer provides additional support for weaker substrates.

The PVC-u covers are replaceable, through coloured and easy-to-clean. They are textured to conceal the effects of impact and abrasion.

Material:	Extruded semi-rigid PVC-u and aluminium
Colour:	Available in 32 colours
Surface finish:	Textured
Thickness of the cover:	2 mm
Height:	0.8m, 1.0m, 1.3m, 2.0m and 4.0m. Can also be cut down to suit specific requirements.
Length:	3.00m
Accessories:	Colour matched caps for top and bottom
Fixing:	Screw fixings as per manufacturer's instructions
Weight:	0.72 kg per m
Fire certification:	B-s2,d0
Resistant to cleaning chemicals:	Yes
Available as BIM object	Yes
Maximum service temp:	60°C

The use of an Aluminium retainer provides reinforced defence against high impact damage from wheeled traffic combined with a shock absorbent PVC cover which can be easily replaced if damaged.
